SUMMARY

Software Engineer with 5+ years building high-performance products with React, Next.js, TypeScript, and Python. I build AI-assisted developer tooling (custom MCP servers, Skills, and agentic workflows with Claude Code and Cursor) and drive its adoption across production teams. As a Tech Lead, I've used it to accelerate delivery without sacrificing quality.

EXPERIENCE

Full-Stack Developer · Orium (formerly Gluo)

Jan 2025 – Present

Full-stack development for a client's main site and promotional pages, from backend work around the Contentful CMS to the Next.js and Tailwind CSS frontend. I also drive AI-assisted development across the team, building custom MCP servers and Skills with Claude Code and Cursor to standardize and accelerate our workflow while keeping quality high.

- Own features end to end, from the Contentful CMS backend to reusable, content-driven components in the Next.js frontend.
- Built custom MCP servers and Skills to standardize AI-assisted workflows across the team.
- Accelerated delivery by introducing agentic coding practices (Claude Code, Cursor) without sacrificing quality.

Tech Lead / Front-End Developer · We Book You

Nov 2023 – Aug 2024

Led a team of 4–6 developers to build and deploy a main MVP and a white-label solution, leveraging React, Next.js, Python, and FastAPI. Owned technical planning and code review, mentored the team's developers, and managed full-stack development and deployment using AWS and Vercel.

- Built a reusable white-label configuration layer that eliminated repeated implementation work when onboarding new clients.
- Profiled and optimized front-end performance, improving page load times across the product.

Co-Founder / Full-Stack Developer · Trescento

Nov 2022 – Nov 2023

Co-founded and led the technical integration between various products, transitioning from a monolithic architecture to a modern, flexible solution. Drove adoption of best practices, enhancing product delivery speed and user satisfaction.

- Successfully migrated to a microservices architecture.
- Introduced engineering best practices and a performance-oriented culture across the team.

Front-End Developer → Tech Lead · Cura Deuda

Apr 2021 – Nov 2022

Joined as a Front-End Developer and was promoted to Technical Lead within the first year. Started by delivering key integrations (Credit Bureau, payment gateways, KYC) with React and JavaScript, then led a cross-functional team overseeing front-end and back-end development across the stack.

- Promoted to Tech Lead within the first year, mentoring developers, owning code review, and planning technical work for a cross-functional team.
- Delivered third-party integrations (Credit Bureau, payment gateways, KYC), streamlining customer onboarding.
- Led key features that increased user engagement and reduced server costs.
- Streamlined front-end/back-end integration, reducing defects across releases.

SELECTED PROJECTS

AVÉLIE Woman `aveliewoman.com`

Editorial digital catalog for a Mexican women's fashion brand: full collection, product pages, size guide and direct ordering via WhatsApp.

GH Solar MX `ghsolar.com.mx`

Website and interactive web app for solar panel installation quotations.

Gateway Fellowship Español `migateway.tv`

Editorial website for a Hispanic church in San Antonio, TX, with a custom design system and sermon streaming.

Adelanta Por Ziff `lumosweb.vercel.app`

Landing page for a fintech providing financial services in the leasing sector in Mexico.

Product Makers `mvp-od.vercel.app`

Landing page for a consulting company.

Silva Master Cleaning `raccoon-smc.vercel.app`

Landing page for a cleaning company with multilingual support.

SKILLS

AI & Agentic: Claude Code, MCP Servers, Agentic Workflows, LLM Integration, Prompt Engineering, Cursor, Codex

Frontend: TypeScript, JavaScript, React, Next.js, Astro, Vue, React Native, Expo, TanStack Query, Redux, Tailwind CSS, Storybook

Backend: Node.js, Express, Python, FastAPI, Flask, REST APIs, PostgreSQL, MySQL, Redis, Prisma, Stripe, Microservices

Commerce & CMS: Composable Architecture, Shopify, Contentful, Contentstack, Appwrite

Web & Analytics: Web Performance, Technical SEO, Accessibility (a11y), i18n, GA4, GTM, Mixpanel, Umami

Testing: Jest, Vitest, Playwright, Cypress

Infra & Tools: AWS, Vercel, GitHub Actions, Git, Turborepo, Sentry, Figma

EDUCATION & LANGUAGES

B.Eng. in Mechatronics Engineering, Universidad Tecnológica del Norte de Coahuila (Aug 2017 – Apr 2021)

English C1 Level, EF SET (Mar 2021)

Spanish: Native · English: C1 Advanced
